Biomembranes

Vol. 1061, 1991

Cumulative Contents

Information for Contributors ix

Regular Papers

Resting membrane potential in 41A3 mouse neuroblastoma cells. Effect of increased glucose and galactose concentrations
M.A. Yorek and J.A. Dunlap (U.S.A.) 1

Plasma membrane-bound carbonic anhydrase activity in the regenerating rat liver
J.J.G. Marín, A. Tabernero Urbieta, F. Pérez Barriocanal, E. Rodríguez Barbero and N. Eleno (Spain) 9

Aminophospholipid molecular species asymmetry in the human erythrocyte plasma membrane
F. Hullin, M.-J. Bossant and N. Salem, Jr. (U.S.A.) 15

β-Galactosidase fused to the hydrophobic domain of cytochrome b_5 spontaneously associates with liposomes
S.K. George, L. Najera, R. Sandoval and G.M. Ihler (U.S.A.) 26

Dioxygen solubility in aqueous phosphatidylcholine dispersions
E.S. Smotkin, F.T. Moy and W.Z. Plachy (U.S.A.) 33

Detection of structural defects in phosphatidylcholine membranes by small-angle neutron scattering. The cluster model of a lipid bilayer
V.I. Gordeliy, V.G. Ivkov, Y.M. Ostanevich and L.S. Yaguzhinskij (U.S.S.R.) 39

Inhibition of the phosphatase activity of the red cell membrane Ca^{2+} pump by acidic phospholipids
J.P.F.C. Rossi and A.J. Caride (Argentina) 49

Uptake of liposomes by cultured mouse bone marrow macrophages: influence of liposome composition and size
T.M. Allen, G.A. Austin, A. Chonn, L. Lin and K.C. Lee (Canada) 56

A microscopic electrostatic model for the amphotericin B channel
M. Bonilla-Marín, M. Moreno-Bello and I. Ortega-Blake (Mexico) 65

Peptide binding to lipid membranes. Spectroscopic studies on the insertion of a cyclic somatostatin analog into phospholipid bilayers
G. Beschiaschvili and J. Seelig (Switzerland) 78

Low potassium-type but not high potassium-type sheep red blood cells show passive K^+ transport induced by low ionic strength
A. Erdmann, I. Bernhardt, S.J. Pittman and J.C. Ellory (G.D.R., U.K.) 85

Chemoreception in *Hydra vulgaris* (*attenuata*): initial characterization of two distinct binding sites for L-glutamic acid
S.L. Bellis, W. Grosvenor, G. Kass-Simon and D.E. Rhoads (U.S.A.) 89

Nucleoside and nucleotide transport through a model liquid membrane. Periodic-catastrophic transport of a novel amantadine phosphoramidate conjugate of 5′-AMP
D.E. Bergstrom, J.K. Abrahamson and M.Y.-M. Chan (U.S.A.) 95

Agents which reverse multidrug-resistance are inhibitors of [^{3}H]vinblastine transport by isolated vesicles
M. Horio, E. Lovelace, I. Pastan and M.M. Gottesman (U.S.A.) 106

Divalent cation-sensitive pores formed by natural and synthetic melittin and by Triton X-100
G.M. Alder, W.M. Arnold, C.L. Bashford, A.F. Drake, C.A. Pasternak and U. Zimmermann (U.K., F.R.G., U.K.) 111

Human platelet P-235, a talin-like actin binding protein, binds selectively to mixed lipid bilayers
H. Heise, T. Bayerl, G. Isenberg and E. Sackmann (F.R.G.) 121

Stabilization of non-bilayer structures by the etherlipid ethanolamine plasmalogen
K. Lohner, P. Balgavy, A. Hermetter, F. Paltauf and P. Laggner (Austria, Czechoslovakia) 132

Phosphorylation of H^+/K^+-ATPase by inorganic phosphate. The role of K^+ and SCH 28080
H.T.W.M. Van der Hijden, H.P.G. Koster, H.G.P. Swarts and J.J.H.H.M. De Pont (The Netherlands) 141

Glucose and nucleoside transporters of human erythrocytes: effects of detergents on immunoadsorption of a membrane protein to its monoclonal antibody
B.H. Jhun, C.J. Berenski, J.D. Craik, A.R.P. Paterson, C.E. Cass and C.Y. Jung (U.S.A., Canada) 149

continued

Fluidity and lipid composition of oat and rye shoot plasma membrane: effect of sterol perturbation by xenobiotics
D.T. Cooke, F.M. Munkonge, R.S. Burden and C.S. James (U.K.) 156

Photo-modulated ion channels based on covalently linked gramicidins
C.J. Stankovic, S.H. Heinemann and S.L. Schreiber (U.S.A., F.R.G.) 163

Reconstitution of the L-leucine-H^+ cotransporter of the plasma membrane from Chang liver cells into proteoliposomes
Y. Mitsumoto and T. Mohri (Japan) 171

Reversible disc-micellization of dimyristoylphosphatidylcholine bilayers induced by melittin and [Ala-14]melittin
C.E. Dempsey and B. Sternberg (U.K., F.R.G.) 175

Lipid changes of goat sperm plasma membrane during epididymal maturation
A.P.S. Rana, G.C. Majumder, S. Misra and A. Ghosh (India) 185

Identification of an osmotically induced periplasmic glycine betaine-binding protein from *Rhizobium meliloti*
D. Le Rudulier, K. Gloux and N. Riou (France) 197

Long-term stabilization and crystallization of $(Ca^{2+} + Mg^{2+})$-ATPase of detergent-solubilized erythrocyte plasma membrane
S. Pikuła, A. Wrzosek and K.S. Famulski (Poland) 206

Location and regulation of octameric mitochondrial creatine kinase in the contact sites
M. Kottke, V. Adams, T. Wallimann, V.K. Nalam and D. Brdiczka (F.R.G., Switzerland, India) 215

Effect of chronic acid loading on rat renal basolateral membrane bicarbonate transport
S.M. Grassl (U.S.A.) 226

The effect of salinity on the phase behaviour of total lipid extracts and binary mixtures of the major phospholipids isolated from a moderately halophilic eubacterium
G.C. Sutton, N.J. Russell and P.J. Quinn (U.K.) 235

The sodium–calcium exchanger of bovine rod photoreceptors: K^+-dependence of the purified and reconstituted protein
U. Friedel, G. Wolbring, P. Wohlfart and N.J. Cook (F.R.G.) 247

Phosphorylation sites in human erythrocyte band 3 protein
D. Yannoukakos, C. Vasseur, J.-P. Piau, H. Wajcman and E. Bursaux (France) 253

Na^+/K^+-ATPase: modes of inhibition by Mg^{2+}
J.D. Robinson and P.R. Pratap (U.S.A.) 267

Characterization of pore-forming activity in liver mitochondria from *Anguilla anguilla*. Two porins in mitochondria?
V. De Pinto, V. Zara, R. Benz, G.V. Gnoni and F. Palmieri (Italy, F.R.G.) 279

Hepatocellular transport of cyclosomatostatins: evidence for a carrier system related to the multispecific bile acid transporter
K. Ziegler, W. Lins and M. Frimmer (F.R.G.) 287

Small-volume extrusion apparatus for preparation of large, unilamellar vesicles
R.C. MacDonald, R.I. MacDonald, B.P.M. Menco, K. Takeshita, N.K. Subbarao and L.-r. Hu (U.S.A.) 297

Reports

Characteristics of $^{86}Rb^+$ transport in human erythrocytes infected with *Plasmodium falciparum*
K. Kirk, K.J. Ashworth, B.C. Elford, R.A. Pinches and J.C. Ellory (U.K.) 305

Water transport in human red cells: effects of 'non-inhibitory' sulfhydryl reagents
G. Benga, O. Popescu, V. Borza, A. Hodârnău, V.I. Pop and J. Wrigglesworth (Romania, U.K.) 309

Author index 315
